Abstract

No description provided (generated by Openapi Generator https://github.com/openapitools/openapi-generator)

1. Endpoints

1.1. Pet

1.1.1. createPet

<code>POST /pets</code>

create

Description

Parameters

Body Parameter

Name	Description	Required	Default	Pattern
CreatePetRequest	*CreatePetRequest*	-		

Return Type

[create_pet_201_response]

Content Type

- application/json

Responses

Table 1. http response codes

Code	Message	Datatype
201	is expected to eq {"id"=>1, "name"=>"三毛猫", "tag"=>nil}	[create_pet_201_response]
422	does not create a pet	[create_pet_422_response]

Samples

1.1.2. indexPets

GET /pets

index

Description

Parameters

Return Type

array[[index_pets_200_response_inner]]

Content Type

- application/json

Responses

Table 2. http response codes

Code	Message	Datatype
200	is expected to eq [{"id"=>1, "name"=>"土佐犬", "tag"=>"Sunanda Devi"}, {"id"=>2, "name"=>"ペルシャ猫", "tag"=>"Nuptse"}]	List[[index_pets_200_response_inner]]

Samples

1.1.3. showPet

GET /pets/{id}

show

Description

Parameters

Path Parameters

Name	Description	Required	Default	Pattern
id		X	null	

Return Type

[show_pet_200_response]

Content Type

- application/json

Responses

Table 3. http response codes

Code	Message	Datatype
200	is expected to eq {"id"=>2, "name"=>"ペルシャ猫", "tag"=>"Dhaulagiri IV"}	[show_pet_200_response]
404	is expected to eq {}	[Object]

Samples

1.2. User

1.2.1. createUser

POST /users

create

Description

Parameters

Body Parameter

Name	Description	Required	Default	Pattern
CreateUserRequest	*CreateUserRequest*	-		

Return Type

[create_user_201_response]

Content Type

- application/json

Responses

Table 4. http response codes

Code	Message	Datatype
201	creates a user	[create_user_201_response]
422	does not create a user	[create_user_422_response]

Samples

2. Models

2.1. *CreatePet201Response*

Field Name	Required	Type	Description	Format
id		Integer		
name		String		
tag		String		

2.2. *CreatePet422Response*

Field Name	Required	Type	Description	Format
name		List of [string]		

2.3. *CreatePetRequest*

Field Name	Required	Type	Description	Format
name		String		
tag		String		

2.4. *CreateUser201Response*

Field Name	Required	Type	Description	Format
id		Integer		
username		String		
first_name		String		
last_name		String		
email		String		
phone		String		

2.5. *CreateUser422Response*

Field Name	Required	Type	Description	Format
password		List of [string]		
username		List of [string]		
first_name		List of [string]		
last_name		List of [string]		
email		List of [string]		
phone		List of [string]		

2.6. *CreateUserRequest*

Field Name	Required	Type	Description	Format
username		String		
password		String		
first_name		String		
last_name		String		
email		String		
phone		String		

2.7. *Error*

Field Name	Required	Type	Description	Format
code	X	Integer		int32
message	X	String		

2.8. *IndexPets200ResponseInner*

Field Name	Required	Type	Description	Format
id		Integer		
name		String		
tag		String		

2.9. *Pet*

Field Name	Required	Type	Description	Format
id	X	Long		int64
name	X	String		
tag		String		

2.10. *PetsInner*

Field Name	Required	Type	Description	Format
id	X	Long		int64
name	X	String		

Field Name	Required	Type	Description	Format
tag		String		

2.11. *ShowPet200Response*

Field Name	Required	Type	Description	Format
id		Integer		
name		String		
tag		String
